CARBON-NEGATIVE

CARPET TILES

-CO₂

WE'RE *'all in'* ON SOLVING THE CLIMATE CRISIS

Carbon negative is possible. We'll prove it.

You have climate targets. So do we. Together, we can reach them—it's the only way we ever will. Lucky for you, we never compromise on anything. Including the planet. It's why we'll be carbon negative by 2040.

Driven by circularity, we design our products with the full life cycle in mind. It's why we make them with recycled, bio-based, and carbon-storing materials. It's why they can be recycled again, and again, and again. It's why we offer carbon negative carpet tiles.

Today, our carpet tiles have the lowest carbon footprint of any in the world. And that's based on publicly available emissions data provided in Environmental Product Declarations.

Of course, there's still a long way to go. To cut yet more carbon in our processes. To store yet more carbon in our products. All our products. To be carbon negative by 2040 through reductions, not offsets.

We'll do it. But how? Our CQuest™ BioX backing has a huge part to play...

CARBON-NEGATIVE CARPET TILES? START WITH THE BACKING

CQuest™ Bio

Our CQuest™ Bio backings began by thinking about circularity. Replacing virgin fossil materials with bio-based and recycled content. Designing them for performance and longevity. And importantly, ensuring that they could be reused and recycled at the end of life.

CQuest™ Bio

CQuest™ Bio is our standard backing on all our carpet tiles. It guarantees maximum flatness and stability. It's compatible with our glue-free TacTiles® system. It forms the sturdy foundation for wall-to-wall installations that will not warp, wrinkle or dome. It's also formulated to ensure the tiles remain in place, even with heavy use.

CQuest™ BioX

Taking carbon storage to the maximum, CQuest™ BioX has the same make-up and practical qualities as CQuest™ Bio, but with a higher concentration of bio-based and recycled materials. So high, in fact, that the carpet tiles we make with it are guaranteed to be carbon negative (cradle-to-gate). Beyond doubt.

How do we do it? We take our CQuest™ BioX backing, and combine it with recycled yarns. Then the tiles store more carbon than their manufacture creates.

So they're carbon negative.

CQuest™ BioX

The first-ever carbon-negative range of carpet tiles, our Embodied Beauty collection is inspired by Japanese aesthetics. Minimalism, restoration, and the organic beauty of the natural world. All highly appropriate to products designed to help restore the health of the planet.

The carbon negative materials in the **CQuest™ BioX** backing, in combination with specialty yarns and tufting processes, result in a carbon negative carpet tile. As standard. From cradle to gate.

Inspired by nature. Designed to respect it.

88%

BIO-BASED AND RECYCLED MATERIALS.*

Negative

CARBON FOOTPRINT.

Many of our carpet tiles use yarn made entirely from recycled nylon – through a process that transforms waste materials such as discarded fishing nets, creating the same quality and integrity as brand-new nylon. Reborn from refuse.

By combining 100% recycled nylon with CQuest™BioX backing, we've created a huge range of carbon-negative carpet tiles in various colourways. From extracting the raw materials to leaving the factory, these tiles store more carbon than they release (cradle-to-gate).

Doing good as well as looking great. Opening up carbon-negative opportunities in buildings around the world.

So, CQuest™BioX is backing carbon-negative carpet tiles. Want to know more?

Discover our optional available carbon-negative carpet tile product portfolio.

*Our carpet tiles manufactured in Europe contain an average of 88% recycled and bio-based materials.

TacTiles®
Easy.
Quick.
Clean.

GLUE-FREE CARPET TILE INSTALLATION

The combination of simplicity, speed and great environmental qualities make TacTiles the perfect fit for Interface carpet tiles.

Inspired by the gecko's ability to seemingly “stick” to surfaces, TacTiles connect the carpet tiles to each other, creating a ‘floating floor’ that doesn’t shrink or expand. That’s how we eliminate the need for glue. No damage to the subfloor and no sticky mess during the installation.

TacTiles make carpet tile installation easy, quick and clean.

REENTRY®

MADE FOR *circularity*

Interface takes your used carpet tiles and puts them to good use – by making sure they get reused. We work with partners to supply the used carpet tiles to charities, small businesses, and social enterprises. Driving a more circular approach, reducing carbon impact, and benefitting those who need it.

If the product isn't suitable for ReUse, we can recycle all our carpet tiles on CQuest™Bio and CQuest™BioX backings through our third-party verified recycling process.

That's been our way for more than 30 years.

A new
home
for your
used
floor.

SHAPE YOUR SPACE WITH OUR EXPERTS

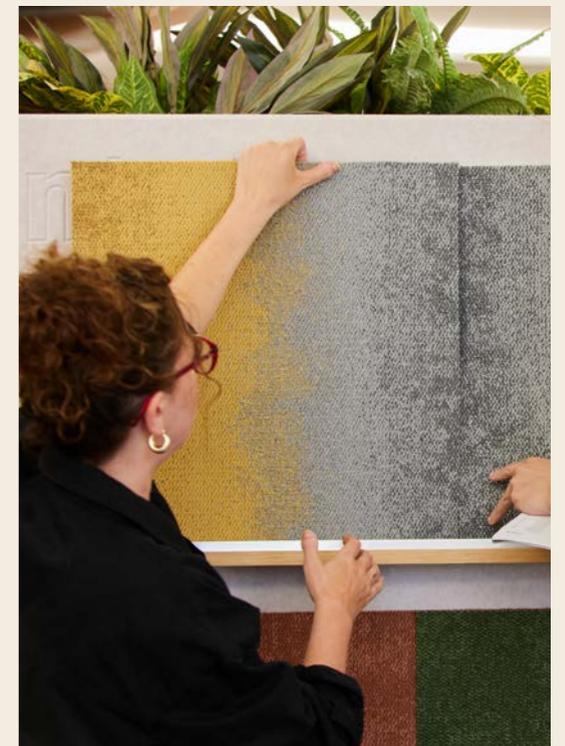

A human-focused, tailor-made, design service.

No two projects are alike – every space has its own challenges that must be addressed in order to create truly beautiful design. However, creative floor designs can be a really impactful way to bring a design vision to life.

Interface Design Studio can support you in finding beautiful, flooring solutions to help achieve your project requirements within your allocated budget.

All the support we offer is bespoke to the project and the designer, which can include creating custom colours, products or mood boards.

We can get involved in just a single phase of the process or offer design support from start to finish.

MADE FOR MORE™

**It's flooring—
and then some.**

Because every floor is made to do more, mean more, for more. With countless colors, textures, patterns, and ways for you to create remarkable spaces.

Every Interface carpet tile, LVT and nora rubber floor is made with purpose and without compromise, to do all kinds of good.
