**DO MORE.  
WITH LESS.**

Our carbon negative product offer is expanding by adding  
CQuest™ BioX backing to even more products.

**363 CARBON NEGATIVE COLOURS**

**38 CARBON NEGATIVE PRODUCTS**

# CQUEST™ BIOX.

## MOVE AWAY FROM THE STATUS QUO.

All our carbon negative products come with CQuest™ BioX backing as a standard option.

The carbon negative materials in the CQuest™ BioX backing, in combination with specialty yarns and tufting processes, result in a carbon negative carpet tile. The finished product combines durability, industry-leading design, and a negative carbon footprint that ultimately benefits the planet and shows that the pursuits of great design and sustainability are inseparable.

First, we added new bio-based materials and more recycled content to our backings. Then, we measured how these materials influence the carbon footprint. These new materials, measured on a stand-alone basis, are net carbon negative – reducing our carbon footprint and resulting in carbon negative backings.

Learn more about carbon negative backings at [www.interface.com/backings](http://www.interface.com/backings)

# ANOTHER STEPPING STONE ON OUR JOURNEY.

We're constantly working to improve our products' quality and lessen their environmental impact. Increasing the number of products having COQuest™ BioX backing available demonstrates we are continuing our journey.

1997

Our global sales meeting becomes a sustainability takeover and a moment to commit to sustainability goals, including reducing carbon emissions across the business.

2000

Released our first biomimicry carpet tile, Entropy™, the first Random design approach resulting in less installation cost, waste, and easier maintenance.

2001

Established a new backing system, GlasBac™, which included up to 81% total recycled content and served as the initial basis to help us achieve carbon negative backings.

2006

Unveiled TacTee®, our first glue-free modular flooring installation method, reducing installation time and eliminating glue waste and future floor prep.

2010

Used 100% recycled content nylon on a product by partnering with yarn supplier Aquafil, once again helping us lower the carbon footprint of our products. Using 100% recycled content nylon on a product (versus the old standard of zero recycled content nylon) can reduce its carbon footprint by 20%.

2012

Launched NetWorks®, a program that collects discarded fishing nets for recycling into new yarn, in partnership with the Zoological Society of London. The program brings recycled content into our supply chain in a way that also contributes to ocean health.

1994

Our founder Ray C. Anderson had a "spare in the chest" moment that kicks off our company's sustainability journey.

1995

Established ReEntry®, recycling program, which recycles carpet to ensure used flooring tiles do not end up in landfills.

1996

Delivered our first sustainability results through the EcoMetrics® program. Partnered with yarn suppliers to develop recycled nylon, which ultimately is the most significant way to lower the carbon footprint of our products.

2016

Launched Climate Take Back™, our sustainability mission that aims to reverse global warming.

2017

Announced the Proof Positive tile, a life-cycle-based carbon negative carpet tile prototype, proving it's possible to make a product with the potential to reverse global warming.

2018

Co-founded material4C4H (Carbon Action Network) to address embodied carbon. Developed our first carbon negative carpet tile backing, CircuitBac™ Green. Extended Carbon Neutral Floors™ program to include all products we sell globally – carpet tile, LVT and non-rubber sheets and tiles.

2019

Celebrated Mission Zero® achievement, including 74% reduction in the global average cradle-to-gate carbon footprint of our carpet since its baseline year of 1994. Additionally, GHG emissions at carpet manufacturing sites are down 96% in intensity and 84% in absolute terms since 1994.

2021

Launched a new range of carbon negative backings and the first ever carbon negative carpet tile product as part of the Embodied Beauty® Collection.

2023

Expanded Carbon Negative product offer for EMPA.
